

Windows XP

Latvian IT Unicode—keyboard driver installation

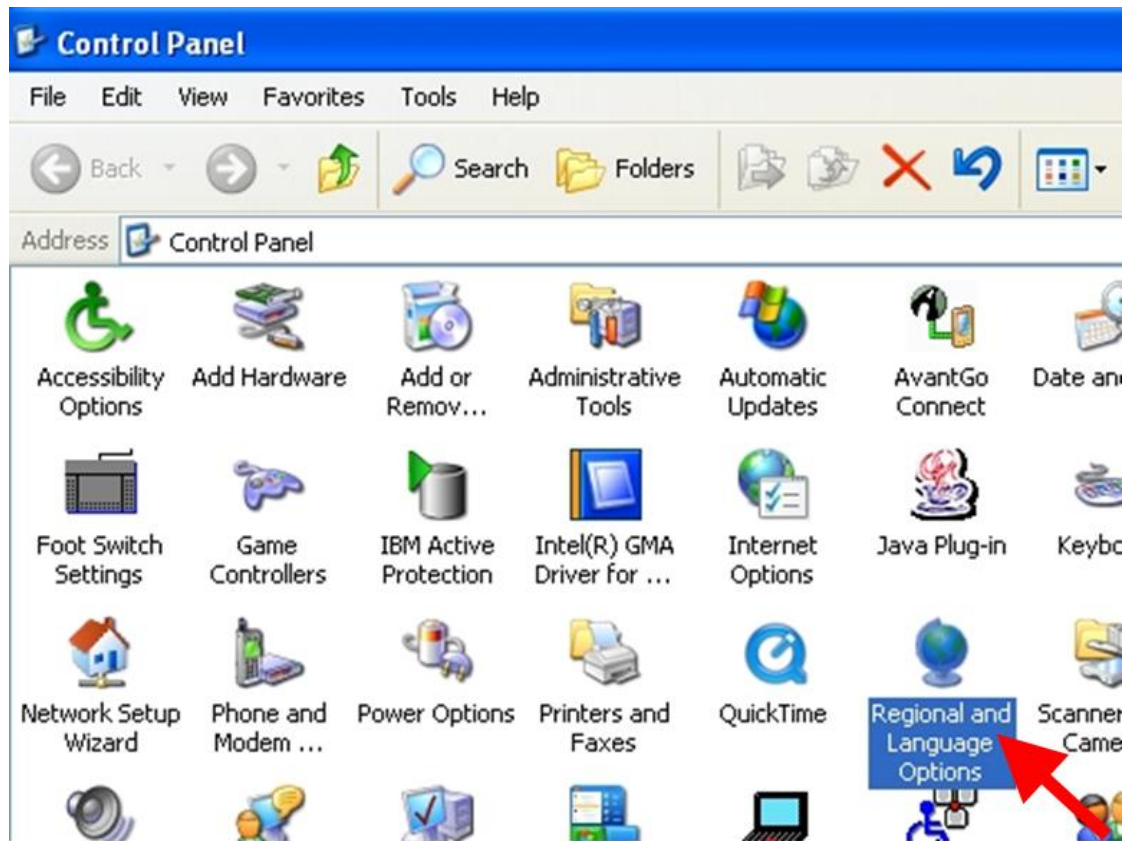

First open folder 'LV_IT_U' and double-click file 'setup.exe'. This will install the keyboard driver into the computer. This must be done first.

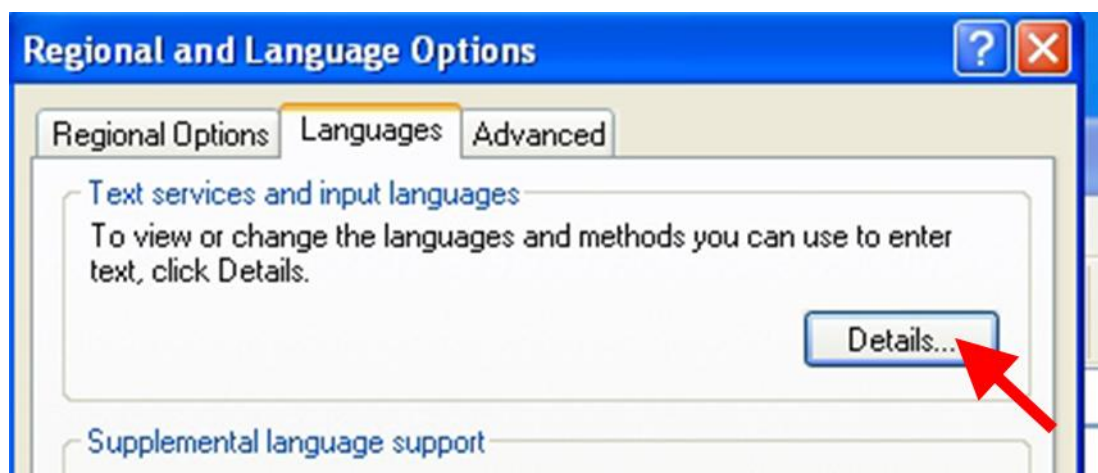

Next click 'Start' and select the 'Control Panel'.

In the 'Control Panel' Window double-click the 'Regional and Language Options' icon.

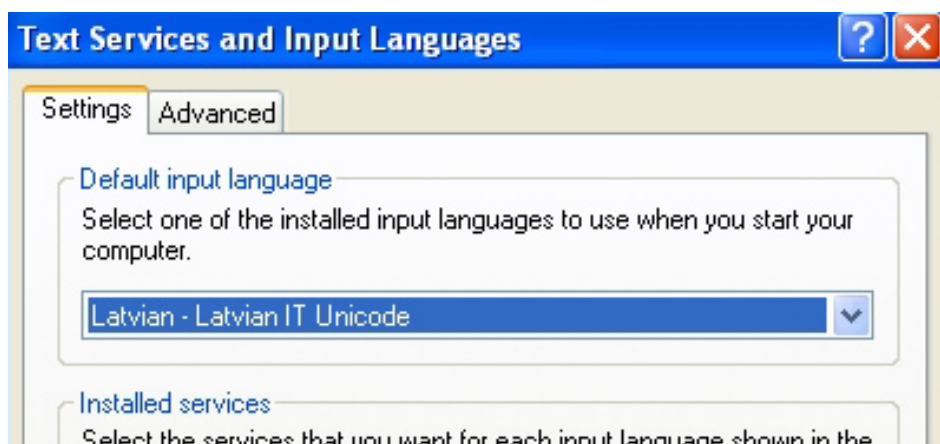

In the 'Regional and Language Options' Window select the 'Languages' tab and click on the 'Details...' button.

In the 'Text Services and Input Languages' Window select the 'Default input Language' and change to:

Latvian—Latvian IT Unicode.

click 'OK', 'OK'

after rebooting your system will be set up for Latvian text (see 'readme.txt' for operating instructions)
